DETAILED ACTION

In response to Amendments/Remarks filed 05/11/2010. The current patent application originally filed 08/25/2006, which claims priority to National Stage entry of PCT/EP05/50264 with foreign priority to No. 10 2004 009 617.1 dated **02/27/2004** (Siemens).

- Claims 1-6, 8-11, 13-20 and 25-26 are pending.
- Claims 1 is independent claim.
- Claims 1 and 8-10 are amended.
- Claims 7, 12, 21-24 and 27 are canceled.
- Claims 2-6, 11, 13-20 and 25-26 were previously presented.

In addition, it is noted the Obviousness-Type Double Patent to claims 1-23 and 25-27, and the 112 and 101 rejections to claims 21-23 and 27, set forth in the previous office action dated 11/12/2009 is hereby withdrawn, in light of Terminal Disclaimer filed 05/11/2010 and Approved 06/04/2010 and further view of the amendment filed 05/11/2010 (@ Page 7 cancelling claims 21-23 and 27).

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Allowable Subject Matter

The prior art made of record:

- US20040068696A1 Seyrat, et al Filed 02/24/2002
- US 20020138514A1 Rising, et al. Filed 10/22/2001

❖ Claim(s) 1-6, 8-11, 13-20 and 25-26 are allowed:

The following is a statement of reasons for the indication of allowable subject matter:

Interpreting the claims in light of the specification, Examiner finds the claimed invention is patentably distinct from the prior art of record, which set forth in the followings:

- Seyrat teaches a MPEG-7 decoder includes XML schemas, in order to obtain a binary syntax code that is executed to decode encoded documents. The compilation process of schemas relies on a prior schema analysis phase and aims at generating finite state automata 12 defined in the form of a binary syntax code, at figures 3, 4 and 5 and at Para 90-91 of Seyrat.
- Rising discloses a methodology to encode an instance document describing multimedia content using schema associated with a context

node. This is generally set forth in Para 9, 43 and illustrates in Fig. 1 of Rising.

Under the broadest reasonable interpretation of the claimed limitation which is consistence with the Applicant's Specification. The prior art cited above fails to teach all of the Applicant's claimed limitation. In particularly, the claimed invention advantageously provides a finer level of detail that enables the coding a structured document, wherein a plurality of codes is generated/allocate by use of ***lexicographically sorting in each instance data types of a name space, which are bequeathed from a specific basic data type of a specific other name space in a list in a sequence of global type codes of respective basic data types as defined in the MPEG-7 standard*** [see the currently amended claim 1 filed 05/11/2010 support in the current specification @ Page 8 lines 6-25 and illustrates in figure 5 .]

The Examiner asserts that the claims overcome the prior art of record as describes above when the limitations are read in combination with the respective claimed limitations in their entirety.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
